How Does the Internet Work?

Uncover the wonder of the World Wide Web!

by David Morton / PAGE DESIGN BY MICHAEL TSE

15

Try to imagine a day without the internet. Pretty tough, right? Whether you're researching for a project or streaming your favorite show, the internet provides **vast** resources. But what is it, and how does it work? 05

When speaking of the internet, we're basically talking about a gigantic network of networks. A network is simply a group of devices that are connected to each other, and any device linked 10 to a network is called a node. You can imagine networks as bustling cities with nodes as the **inhabitants**. Our network city thrives because of certain key **infrastructures**, including network interface cards (NICs), switches, routers and 15 wireless access points (WAPs).

The internet is a massive network of networks that relies on many layers of technology.

Usage Tip

Whether ... or ... 用於強調兩種可能性，無論哪種情況發生，結果都將如何。這種句型強調在兩種情況之間的選擇，而最後的結果，則會放在 whether ... or 後面的句子。例句：Whether you choose to study abroad or stay in your home country, it will broaden your horizons.

Talk About It

● Aside from the image of a bustling city, what are some other ways to describe the internet?

● Which method of connecting to the internet would you like to learn more about?

NICs act like ID cards for devices such as laptops, allowing them to be recognized by the network and communicate within it. Switches are like traffic police, directing the flow of data to 05 prevent digital traffic jams and ensuring smooth communication between devices, or nodes. Routers are akin to train stations, directing data between different networks to ensure it reaches its destination without getting lost. Lastly, WAPs 10 are **essentially** like cell towers, allowing nodes to wirelessly communicate with the network, and with each other.

16

There are several ways to connect to the internet, the most common being **via** the wired internet. The wired internet consists of over a million kilometers of wires, including fiber-optic cables which transfer data 05 at extremely fast speeds. Many of these cables even **traverse** oceans, connecting different continents. For locations too remote to support wired connections, satellites, like SpaceX's Starlink network, can beam 10 the internet down from space. Finally, what cellular internet does is provide connections without relying on fixed-line infrastructure.

Usage Tip

What S does is (to) + V 用於強調某人或某物的行為所帶來的結果以及影響。在句子中，to 可以省略，但意思不變。類似句型：the only thing (that) + S + do/does + is (to) VR，all (that) + S + has/have to do + is (to) VR。例句：What she does is (to) help people in need.
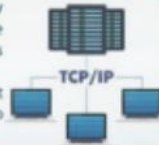

VIPs of Internet Infrastructure

TCP/IP protocols: The internet relies on a special set of rules or protocols to ensure that data is sent accurately and efficiently between devices. Transmission control protocol (TCP) is responsible for how data is broken into digital parcels. Internet protocol (IP) is responsible for how it is routed across the internet.
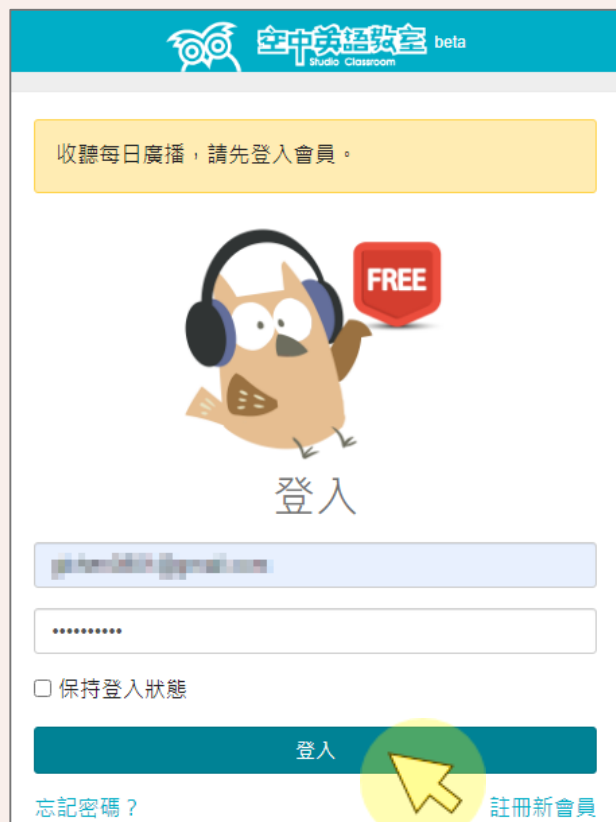

Servers: Servers are powerful computers that store and transmit data across the internet. They maintain websites, provide access to online services and store gigantic amounts of data.

Domain Name Servers (DNS): DNS servers convert domain names (such as www.google.com) into IP addresses (such as 172.217.7.46), which are used to route data packets across the Internet.

COUNSELLING FOR TOADS: A PSYCHOLOGICAL ADVENTURE
－蛤蟆先生去看心理師－
A story that takes readers on a journey of self-discovery

Toad, the central character of Counselling for Toads: A Psychological Adventure, has not been as cheerful[1] as usual for a while. He has lost interest in his usual hobbies and stopped having fun. He barely[2] eats and has lost a lot of weight. Moreover, he has given up[3] caring about his appearance, so his clothes look shabby and smell terrible.

Toad should be happy because he is rich and has a big house. His good friends, Rat, Mole, and Badger, have tried everything to restore[4] his enthusiasm[5] and humor. As a last resort, they advise Toad to seek help from a counselor named Heron.

Heron listens patiently and learns that Toad often hides his true feelings and always pretends[6] everything is fine when he feels worthless[7]. Heron says Toad's negative emotions are the result of the relationship he had with his father and his mother, who showed him very little love and affection. Heron diagnoses Toad with depression.

While accompanying[8] Toad on his psychological journey, readers can learn how to face their own feelings and develop healthy minds. They may also discover new things about themselves and move confidently towards happier futures.
